It comprises members from different Ministries including Ministry of Non-Conventional Energy Sources and other organizations.

The main objectives of this Mission are :—

(i) to evolve a strategy based on technology which could provide for low cost power generation and low cost of delivery in the rural areas which can be managed by local institutions like Village Panchayats and NGOs;

(ii) identify feasible size of generating units for different fuels, which are locally available, and for mini and micro hydel projects;

(iii) suggest type of technologies to be adopted for setting up local distribution networks with or without connectivity to the Grid and to cover at least 25% of the villages in the country under the Mission, and

(iv) to access funds requirements for the next two Plans.

(d) REST Mission has identified biomass gasification, Solar Photo Voltaic Cells and generating sets based on locally available fuels as the feasibe technology for villages and household electrification.

(e) Under section (4) of the Electricity Act, 2003, National policy for distributed generation (Stand along System) including those based on renewable sources of energy and other non-conventional sources of energy is to be notified in consultation with the State Governments. Implementation under REST Mission depends on notification of the above policy.
